\* As estimated by the Ministry of Economy and KSE, the overall Ukraine's economic losses due to the war, taking into account both direct losses calculated in this project and indirect losses (GDP decline, investment cessation, outflow of labor, additional defense and social support costs, etc), ranges from \$564bn to \$600bn

These estimates are not comprehensive, as the information on numerous damages and destructions may be missing due to the lack of possibility of citizens, local and state authorities to promptly record the damage in each city, town, villages, etc.

\*\* Revaluation is caused by using a more precise estimate of an average unit cost. We are going to further update methodology for this group in the next release.
